SUMMARY:

Software Developer with strong problem-solving ability and hands-on experience in product development, AI-enabled systems, automation workflows, and real-world business applications. Skilled at requirement understanding, system thinking, debugging, validation, and delivering practical solutions using Java, Python, React, Android, SQL, and modern engineering tools in a product-based company environment.

SKILLS:

Technical Skills	System Design, Python, JavaScript, PostgreSQL, REST APIs, MySQL, HTML, CSS
Frameworks	Spring Boot, FastAPI, LangGraph, LangChain, React, Next.js, Android, Frappe, ERPNext
Tools	Git, Docker, Redis, Redmine, Postman, AWS EC2
Others	AI Product Development, Agentic Workflows, NL2SQL, Requirement Analysis, API Design, Debugging

EXPERIENCE:

July 2024 - **Present**

Kritilabs Technologies Private Limited , Chennai

Role: Software Developer

- Worked on product development across AI-enabled systems, RFID tracking, video analytics, ERP workflows, and automation tools. Contributed to requirement understanding, workflow design, frontend and backend development, debugging, and delivery of practical real-world solutions.

PROJECTS:

- **Sentinal Kote - Indian Army:** Built an offline RFID-based weapon inventory tracking system to replace manual ledger-based issue and return workflows. Gathered requirements directly from Army camp soldiers and delivered the Android app, React UI, and Java backend end-to-end within 2 weeks. Implemented guided UI walkthroughs for faster user onboarding.
- **Crowd Monitoring - Indian Railways:** Worked on an AI video analytics-based crowd monitoring solution for Indian Railways, deployed at Naini and Prayagraj Chheeki railway stations. Supported real-time crowd visibility, monitoring workflows, and scalable operational tracking through the REMP platform.
- **I-Kendrait - Indian Oil (IOCL) and Bharat Petroleum (BPCL):** Built responsive UI screens for vehicle tracking, trip history, alerts, and live API-based status updates. Integrated map-based tracking using React and Leaflet.js to improve fleet visibility and operational monitoring, OTP-based smart lock operations, real-time lock status, remote control, and approval-based access flows

EDUCATION:

Bachelor of Technology - Computer Science Engineering

CGPA: 7.2955

2020 - 2024 | Sastra Deemed to be University, Kumbakonam, Thanjavur, Tamilnadu.

CERTIFICATIONS:

- Software Engineering By IBM 
- BackEnd Developement By Meta 
- Machine learning 
- FrontEnd Developement By Meta 
- Python crash course By Google
