

Deepakraj B

JAVA BACKEND DEVELOPER | SPRING BOOT & MICROSERVICES

deepakrajb@zohomail.in | +91 95007 56675 | Chennai, Tamil Nadu, India

PROFILE

Java Backend Developer with hands-on experience designing and building Spring Boot microservices in production environments. Skilled in REST API design, database performance tuning, and secure authentication using Spring Security and JWT. Proven track record of improving API response times and data throughput through query optimization and resilient service architecture. Comfortable working across the full backend lifecycle, from schema design and Flyway migrations to containerized deployment on AWS.

EXPERIENCE

Java Backend Developer

July 2024 - Present

KritiLabs Technologies, Chennai, India

- **Microservices Architecture:** Designed and developed Spring Boot microservices from scratch, breaking down monolithic modules into independently deployable services using Spring Cloud (Config Server, Eureka Service Discovery, API Gateway) for centralized configuration management and dynamic routing.
- **API Performance Optimization:** Reduced REST API response times by **25%** through DTO mapping improvements, query rewriting, and pagination optimizations using Spring Data JPA and Hibernate, significantly reducing unnecessary database round-trips.
- **Database Engineering:** Improved data throughput by **35%** by implementing composite indexing strategies, resolving N+1 query issues, optimizing HQL/JSQL queries, and managing transaction boundaries effectively across PostgreSQL and MySQL databases.
- **Security and Authorization:** Implemented JWT-based stateless authentication and a dynamic role-based access control (RBAC) system using Spring Security, including custom filter chains, 401/403 error handling, and endpoint-level permission enforcement across all microservices.
- **Resilience Patterns:** Integrated Resilience4j to enforce Circuit Breaker, Retry, and Rate Limiting across inter-service HTTP calls, improving system stability and protecting against cascading failures during downstream service outages.
- **Database Migrations & Zero-Downtime Deployments:** Managed all schema versioning using Flyway, enabling safe, reproducible, rollback-capable database updates across development and production environments. Containerized services with Docker and deployed to AWS (EC2, S3).
- **Code Quality and Collaboration:** Wrote unit and integration tests with JUnit 5 and Mockito; maintained API documentation via Swagger/OpenAPI. Actively participated in Agile/Scrum ceremonies and provided code review feedback to junior team members.

TECHNICAL SKILLS

Languages & Frameworks: Java (8, 11, 17), SQL, Spring Boot 3.x, Spring Framework 6, Spring Cloud (Config Server, Eureka, API Gateway), Spring Security, Spring Data JPA, Hibernate

Databases: PostgreSQL, MySQL, Flyway, Query Optimization, Indexing, Transaction Management

Cloud & DevOps: Docker, AWS (EC2, S3), Maven, Gradle, Git, CI/CD Pipelines, JIRA, Agile / Scrum

Currently Learning: Apache Kafka, RabbitMQ, Redis (Distributed Caching), Kubernetes, Prometheus & Grafana, OAuth2 / SSO

API & Architecture: RESTful API Design, Microservices Architecture, Resilience4j (Circuit Breaker, Retry, Rate Limiting), SOLID Principles, Clean Architecture

Security: Spring Security, JWT Authentication, Role-Based Access Control (RBAC), Dynamic Authorization

Testing & Docs: JUnit 5, Mockito, Swagger / OpenAPI, Postman

EDUCATION

B.Tech, Computer Science & Engineering

SASTRA Deemed University · 2020 – 2024

Languages: English, Tamil

Chennai, Tamil Nadu, India
